

# Feeder connect to VFFS machine

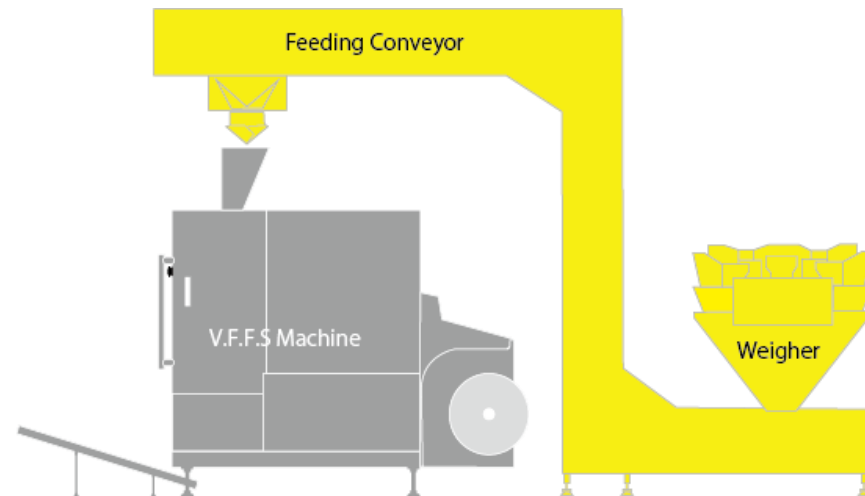

## Feeder connect to VFFS machine

### Auger filler (Powder)

The combination with auger filler is suitable for powder filling, especially the powder is easy to fly such as flour.

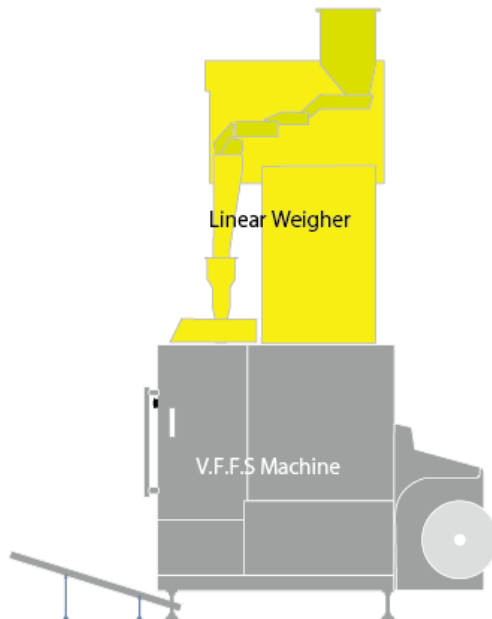

### Weigher -Bucket conveyor

For limited ceiling space, bucket conveyor shown in the picture is used between the weigher and vffs machine.

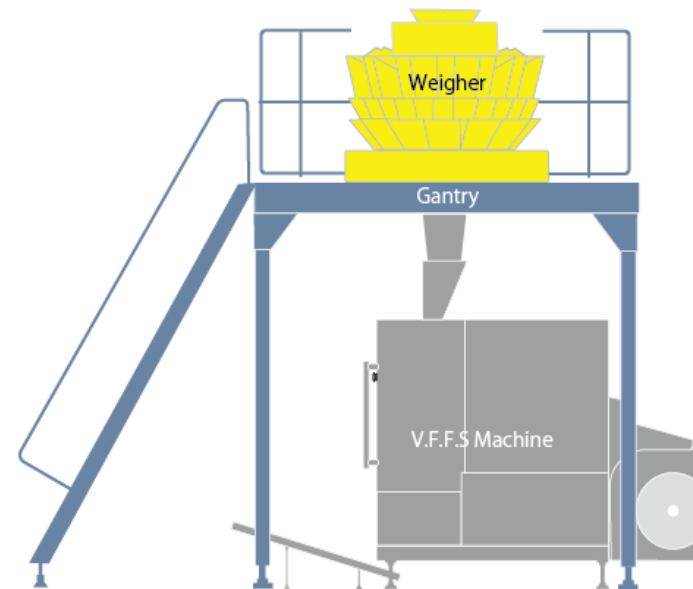

## Feeder connect to VFFS machine

Linear Weigh

Direct connection with linear weigher has simple structure and compact for installation. Suitable for delicate products  
Ex. Biscuits, Dried seaweed

Multi-head weigher with gantry

Multi-head weigher is used when high-speed operation and high-accuracy is required. This leads to labor saving and production efficiency.
